TO: Minerals File
FROM: Tom Munson, Reclamation Hydrologist *T*
RE: Site Inspection, David Penney, Sliver 1-4 Mine, S/001/035, Beaver County, Utah

Date of Inspection: April 22, 1996
Time of Inspection: 3:00 p.m. - 5:00 p.m.
Conditions: Sunny, clear
Participants: Tom Munson, and Lynn Kunzler, DOGM

Purpose of Inspection: To observe new construction and enlargement of the pit that took place in 1996.

The North side of this site was inspected on April 22, 1996. Mr. Penney has enlarged his pit by one or more acres. A new access road has also been constructed, which is adjacent to the access road which occurs almost at the pit elevation. There is an overall concern that this disturbance is reaching five acres or greater. We need to inform Mr. Penney that he needs to be careful in terms of reaching the five acre limit or he will need to bond as a large mine.

We also need to contact the BLM regarding the current disturbance and assure they are aware of what is happening at this site.
